Full-Stack Web Developer with skills in time management, problem-solving, and building processes. Creating products in a growing industry for people to appreciate. Experience with HTML, CSS, Javascript, React, Python and Angular.

EXPERIENCE

Palagio, Jacksonville, FL — *Sous Chef / Kitchen Manager*

October 2020 - December 2021

- Manage day to day operations, menu building, ordering, preparation, time management, and food storage/safety.
- Direct and train kitchen staff and waitresses, create schedules and take customer feedback.

Olympus Ranch, Salt Lake City, Ut — *Sous Chef*

2014 - 2018

- Direct kitchen staff and workflow in the afternoon and evening hours, Ordering and taking stock of supplies.
- Feeding 250-300 residents, providing four options for lunch and dinner service as well as an open menu for any time meal choices.

SLC Expo Center, Salt Lake City, Ut — *Cook / Potager*

2010 - 2013

- Cooperated with a very large team of cooks and prep cooks. The Expo center housed every year's largest events, having over 3500 people attending breakfast, lunch, and dinner service.
- As Potager, I was responsible for cooking the soups each day for lunch and dinner services, managing cook times, and following the chef's recipes, as well as my own.

PROJECTS

MyFlix Angular Client —
https://drixaboi.github.io/myFlix-Angular-client

This project was built using Angular CLI and was an introduction to Typescript. Created and hosted the database on Heroku. It is an educational project with the purpose of building an app where users could create an account, browse movies, and receive the movie's director, genres, and a basic description.
